Sam and David,

Just raising this to your attention that OW has requested we revert back to inclusion of the DW/WW tables in our daily reports. This is in conflict with your direction to only include the maps. At this point in the day, we will continue on our current course for the afternoon report and include only the maps. We can certainly revisit this issue and discuss tomorrow or later this week.

Still hoping we can move to a full report in the morning and an abbreviated executive report in the afternoon (per my email proposal earlier today).

Note comment in email from Mike Shapiro about the type of numbers (populations served in this case) and ability to read on a cell phone. Any Update format revisions should be done with both of these points in mind.

Subject: Re: Change in POC for the Weekend

Here's the request to the REOC and water program from earlier today. Please let me and water desk know if you'd like to modify anything.

- 1) Provide the summary tables that were appearing in the Regional SitReps up until a few days ago, but with population information added
- 2) Provide an excel export from response manager showing all and only the facilities in the universe you are considering, with population information added
- 3) Provide the maps that are appearing in the current SitReps, but with the added categories for drinking water of 'status fine' and 'not contacted', and with numbers of systems for both maps for all categories in the legends
- 4) Use the data summary tables that have customarily used for past responses (attached, and pasted below).

Drinking Water and Waste Water Facility Status Summary Tables

Drinking Water Systems

Included Area:		
	# of systems	Population served
Operating with no use restrictions		
Operating with use restrictions		
Not Operating		
Unknown		

Comments:

Note: use restrictions could include boil water, do not drink, do not use, conservation measures, or other categories.

Wastewater (Includes Collection, Treatment, and Discharge)

Included Area:		
	# of systems	
Operating		
Partially Operating		
Not Operating		
Unknown		
Comments:

David,

Thanks. I certainly agree with your basic point. However, I have to say that while the maps are nice, we are always going to be asked for numbers, so I don't see them as a replacement for the simple data tables. Of course the tables could be incorporated as notes for the maps, if that's more convenient. It will make it much harder to read on a cell phone, however!

All, I have been in contact with the HQ EOC water desk and we are working the data issues with the REOC. My position, hopefully consistent with everyone's, is that whether the data are presented in tabular or GIS form doesn't matter as much as whether we have the key data. Right now, in the maps, we lack some key data for DW systems (fully operational, status unknown) and possibly for WW systems (status unknown), and so we have requested that data from the REOC. We established with all the regions some years ago the basic information to be included in situational reports, so if we can abide by these data categories, we should have the necessary data. The water desk will keep you posted. D

Subject: Change in
POC for the
Weekend

Monica and San,

Unfortunately
Jennifer Mclean is
dealing with a
serious family issue
this weekend and
needs to deal with
that first. So until
Peter gets back
Tuesday make me
the POC if you
need anything.

Call me on my cell
at (b) (6) or
email me if you
need anything.

Thanks
Lee
